---

## PROFILE

Computer Engineering graduate building Python backend services and cross-platform mobile applications. Experience spans customer support workflows, API integrations, Android releases and applied AI tools. Comfortable working across databases, asynchronous processing and mobile interfaces.

---

## TECHNICAL SKILLS

|                          |                                                                                                       |
|--------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Backend and data</b>  | Python, FastAPI, Flask, SQLAlchemy, Alembic, PostgreSQL, SQLite, Redis, Celery, REST APIs, WebSockets |
| <b>Mobile</b>            | Dart, Flutter, React Native, Riverpod, Provider, BLoC / Cubit, Firebase, Hive, SQflite                |
| <b>Tools and systems</b> | Git, pytest, Linux, Amazon S3, SQL, TypeScript / JavaScript, TCP/IP, Cisco routing and switching      |

---

## PROFESSIONAL EXPERIENCE

### Backend Developer

Dec 2025 – Present

Cuoral Technologies · Remote

- Develop Python / FastAPI backend features for a customer support platform, including email ticketing, surveys, ticket routing and workflow automation.
- Build PostgreSQL data models with SQLAlchemy and manage schema changes with Alembic; implement background tasks and caching with Celery and Redis.
- Integrate Amazon S3 storage and contribute automated tests, API integrations and ongoing platform maintenance.

### Mobile Application Developer

Dec 2025 – Present

OmegaPi Technologies · Remote contract

- Build and maintain Flutter applications, including JobSphere, NGOJobSite, LiveFootballScore and PrimeScan, from API integration to Android release.
- Implement state management, local persistence and caching; integrate Firebase, WordPress services, payment gateways and Google Play Billing.
- Prepare release builds and manage Google Play submissions, updates and maintenance.

---

## EDUCATION

### BEng, Computer Engineering

2025

Ahmadu Bello University, Zaria · CGPA: 4.01/5.00

### ALX Software Engineering

Completed 2025

Backend specialisation

---

## SELECTED PROJECTS

### NetConnect

Local-network messaging

Built a FastAPI backend and Flutter client for direct and group chat, file sharing, JWT authentication and real-time WebSocket communication. Designed the system to work on a LAN without internet access; documented its implementation and evaluation in a final-year thesis.

[Backend repository](#) / [Flutter client](#)

### JobSphere

Android application

Developed a Flutter job discovery app integrating USAJobs, Reed UK and Workforce Australia APIs. Implemented search, filtering, pagination, saved jobs and persistent theme preferences using Riverpod and local storage.

[Google Play](#)

### PrimeScan

Document scanning and OCR

Developed Flutter features for document capture, image enhancement, Google ML Kit text recognition and multipage PDF export. Used BLoC / Cubit and Hive for a local document library, tagging and sharing.

[Google Play](#)

### English to Hausa Media Pipeline

Speech and language tools

Built a FastAPI pipeline for media processing, speech transcription, English-to-Hausa translation and speech synthesis, integrating Whisper, Gemini, FFmpeg and gTTS.

[Project repository](#)

### KimsCut

Business operations

Built a React Native application with Firestore and Firebase Authentication for operator, cashier and manager roles. Implemented real-time queues, payment records, analytics and CSV exports.

---

## ADDITIONAL EXPERIENCE AND TRAINING

### Computing Tutor

2026 – Present

Great Insight International Academy · Kaduna

Teach practical computing, Python and digital literacy to Basic 8 and Basic 9 pupils; prepare lessons, demonstrations and laboratory activities.

### Computer Engineering Intern

May – Nov 2024

Ahmadu Bello University · SIWES

Configured Cisco routers and switches, practised subnetting, and completed LAN troubleshooting, connectivity testing and technical documentation.

Cisco Networking Academy: CCNA 1–3 coursework · Huawei HCIA: openEuler and openGauss · Google Cybersecurity Certificate (Coursera) · ALX AI Career Essentials
