RESEARCH INTERESTS

Reliable AI systems; distributed and networked applications; efficient inference under resource constraints; educational technology.

EDUCATION

Ahmadu Bello University, Zaria

2025

Bachelor of Engineering in Computer Engineering · Computer Systems and Networks

CGPA 4.01/5.00 · Final-year semester GPAs: 4.73/5.00 and 4.90/5.00.

Selected A grades: Cloud Computing; Network Technology I and II; Network Security and Cryptography; Machine Learning Fundamentals; Computer Vision; Linear Algebra II; Final Year Project.

ALX Software Engineering Programme

Completed 2025

Backend specialisation

SELECTED ACADEMIC AND TECHNICAL PROJECTS

NetConnect

Undergraduate final-year project

- Built a LAN messaging system with FastAPI, SQLite and Flutter, with JWT authentication, WebSocket communication, direct and group messaging, and file sharing.
- Designed the application to operate without internet access and documented its implementation and evaluation in an undergraduate thesis.

[Backend repository](#) / [Flutter client](#)

English to Hausa Media Pipeline

Built a FastAPI application integrating media processing, speech transcription, English-to-Hausa translation and speech synthesis using Whisper, Gemini and gTTS.

[Project repository](#)

StudyPal

Nigeria National AI Hackathon 2025

Contributed as the mobile developer in a three-person team building an educational application with Flutter, Firebase and the Gemini API, incorporating learning content, quizzes and an AI tutor.

[Project repository](#)

Humour Detection Experiments

Implemented text classification experiments, including averaged FastText embeddings with logistic regression and an LDA/CNN-BiLSTM variant, using Python and machine learning libraries.

PROFESSIONAL AND TEACHING EXPERIENCE

Backend Developer

Dec 2025 – Present

Cuoral Technologies · Remote

- Develop backend features for a customer support platform using Python, FastAPI and PostgreSQL, including email ticketing, surveys, ticket routing and workflow automation.
- Implement background processing with Celery and Redis; integrate Amazon S3 for storage; contribute database models, Alembic migrations and automated tests.
- Collaborate on API integration and maintenance across a shared application codebase.

Mobile Application Developer

Dec 2025 – Present

OmegaPi Technologies · Remote contract

- Build Flutter applications using Dart and Riverpod, integrating APIs, local persistence and backend services.
- Work on production Android releases and maintenance, including JobSphere and NGOJobSite.

Computing Tutor

2026 – Present

Great Insight International Academy · Kaduna

- Teach practical computing to Basic 8 and Basic 9 pupils, including Python and digital literacy; prepare lessons, demonstrations and laboratory activities.

Computer Engineering Intern

May – Nov 2024

Ahmadu Bello University · SIWES

- Completed training in router and switch configuration, subnetting, LAN troubleshooting and technical documentation.

ACADEMIC WRITING

Design and Implementation of NetConnect: A LAN-Based Real-Time Messaging Application

Undergraduate thesis · Ahmadu Bello University · 2025

Virtual Reality (VR) in Real Estate: Opportunities, Challenges, and Solutions for Virtual Property Tours

Co-authored academic report · 2025

TECHNICAL SKILLS

Programming	Python, Dart, SQL, Bash
Backend and data	FastAPI, Flask, SQLAlchemy, Alembic, PostgreSQL, SQLite, Celery, Redis, REST APIs, WebSockets
AI and analysis	TensorFlow, scikit-learn, pandas, NumPy, Whisper, Gemini API
Systems and tools	Flutter, Riverpod, Git, pytest, Linux, Cisco routing and switching, TCP/IP, subnetting

SELECTED TRAINING AND CERTIFICATES

- Cisco Networking Academy: CCNA 1–3 coursework (ITN, SRWE, ENSA), NITDA Local Academy.
- Huawei HCIA: openEuler and openGauss
- Google Cybersecurity Certificate, Coursera
- ALX AI Career Essentials
